

At **Focus on Caring**, you and your loved ones can be provided with home or facility care for anywhere from a few hours a month to 24 hours a day. RNs spend time with you and your loved ones doing an assessment of their health care needs. After this assessment, we ensure a compatible caregiver is placed. We work hard to match these caregivers with our clients to ease the establishment of an ongoing professional relationship. Our RNs continue to monitor and supervise your loved ones' care, communicating with the family and keeping you informed.
